Tenova Core Contracted to Supply Heat Treating Furnace at SSAB

Pittsburgh, PA, May 20, 2010—Tenova Core has recently been contracted to design and supply an austenitizing/tempering roller hearth furnace at SSAB's Axis, Alabama plant. The furnace will be installed as part of the new plate quench and temper line project.

The roller hearth furnace will feature an efficient electrical heating system and high quality rolls. The furnace will be pre-assembled in modular sections prior to shipping, in order to minimize the furnace installation time required at the plant. The new quench and temper line is expected to start-up in the first half of 2012.

About Tenova Core

Tenova Core is a leader for the design and supply of reheating, heat treating, specialty and carbon processing furnaces as well as melt shop equipment, technical services and automation systems. For more information visit www.tenovacore.com

About Tenova

Tenova designs and supplies advanced technologies, products and services for the metals and mining industries. Tenova operates close to its customers through a network of 33 companies based on the 5 continents. For more information visit the company's website at www.tenovagroup.com
